

Professional Development Request: The Coefficient

March 1–3, 2027 | Orlando, Florida

I am requesting approval to attend The Coefficient, a conference focused on mathematics education, instructional practice, research, and the future of math learning.

The conference is built around four pillars that directly support my professional growth and our school's commitment to mathematics achievement:

CONNECT — Multiply Your Network & Impact

Connect with passionate mathematics educators, leaders, and researchers who are actively tackling the national math crisis. Build a collaborative community focused on overcoming math anxiety, driving systemic change, and multiplying student success across classrooms and districts.

SHARE — Unpack Classroom Reality & Proven Practice

Share real-world instructional breakthroughs, pencast analytics, and practitioner-led strategies directly from the field. Discover how educators are making student thinking visible, diagnosing hidden misconceptions, and transforming daily math instruction into measurable growth.

LEARN — Master the 'Science of Math' & Data-Driven Strategy

Learn cutting-edge, research-backed approaches to mathematics instruction, assessment, and foundational progressions (from early subitizing to advanced calculus). Engage in deep-dive workshops on state accountability data, learning pathways, and strategies to build teacher content confidence.

SHAPE — Drive the Future of Mathematics Learning at KAITLab

Shape what comes next by collaborating directly in our Product & Strategy Labs. Share your critical feedback, ideas, and classroom experiences to guide KAITLab's AI engine, smartpen innovations, and the national vision for mathematics education.

Value to Our School

Attending The Coefficient will provide practical ideas, research, strategies, and connections that I can bring back to our school and share with colleagues. The experience will support my continued professional growth while contributing to stronger mathematics instruction and student outcomes.
